AB Disclosed are perfumed, dry particulate detergent and detergent/bleach compns. comprising anionic surfactant; solid builder and/or filler materials; and a blooming perfume compn. The components of the blooming perfume compn. are defined by their b.p. and their octanol/water partition coeff. Such compns., which optionally contain a Cl bleach, are useful for the hand washing of cook and/or eating utensils. The perfume component utilized therein is ready noticeable to the user of the compn. but does not spot or film surfaces washed using such compns. Thus, a detergent was obtained from a linear alkylbenzenesulfonate 25, Na tripolyphosphate 40, Na silicate 7.5, a blooming perfume 1.2, CM cellulose 1 and balance of water to 100%.
